ShareHub – Trusted Resource Sharing

Prototype for the problem statement **Unlock Underused Equipment and Spaces**.
Serves campus labs and makerspaces: owners list equipment and spaces, users check eligibility, request slots, and every action is recorded.

Live demo: <PASTE YOUR PUBLIC LINK HERE>

Run locally

No install needed. Download the repo and open `index.html` in any browser.

How to test (use the "Viewing as" dropdown, top of page)

1. **Meera (Owner)** → Listings: publish a new resource, or use the seeded ones.
2. **Tom (Community maker)** → Discover → 3D Printer Bay → Submit credential for each missing item.
3. **Meera** → Verifications → Verify.
4. **Asha** or **Tom** → request a slot. Request Ravi's slot (tomorrow 10:00) to see the automatic waitlist.
5. **Meera** → Requests → Approve, Waitlist or Reject (reason required to reject).
6. Requester → My bookings → "Jump to start" → Check in → Return (choose "Damaged" to auto-create an incident).
7. **Meera** → Confirm return, then Incidents → Resolve.
8. Open **History** on any booking, or the **Audit log** tab.
   Use the Reset button to restore the starting data.

Features

Listings with rules and eligibility, search and filters, credential verification, booking requests, conflict detection, waitlist with automatic promotion, fair-use weekly cap and usage-based priority, owner approval/rejection with reasons, check-in/return condition records, damage/delay/incident reports, extensions, cancellations, notifications, role-based views, full audit history.

Tech stack

Single-file HTML, CSS and vanilla JavaScript. No external libraries, templates or APIs. Data is held in memory (resets on reload). All demo data is fictional.

AI disclosure

Built with assistance from Claude (Anthropic) for code generation; reviewed and tested by the team.

Known limitations

No real authentication, no backend or database, no document upload, no real email/SMS notifications.
